eMarina Remote Screen

REMOTE SCREEN FOR EMARINA

Worried about berth holders not being able to use their phones onsite to access eMarina and top up? What if reception is closed? How about somewhere guests can learn about using eMarina by watching videos?

The eMarina remote screen, working via Wi-Fi or hard wired allows your guests to fully interact with eMarina as much of as little as you want and provides all the features, including topping up, that your customer will need.

But that's not all – additional options include animated guest instructional videos and even the opportunity to advertise your site events on the screen

Options include: Tempered protective glass which allows touchscreen use and swivel mount base

Incorporating a Samsung 11inch Touchscreen as our partner screen provider

Tempered glass protective screen option – allows touchscreen operation

SAMSUNG
